

PALAVALASA SIVA KUMAR

Visakhapatnam, Andhra Pradesh, India - 530048

+91 9346634324 — sivakumar756948@gmail.com — LinkedIn — GitHub

Professional Summary

Highly motivated third-year Computer Science (Data Science) student (CGPA: 8.9) with strong programming and analytical skills. Experienced in building data-driven applications and solving real-world problems. Eager to learn, contribute, and grow through internship opportunities.

Education

Gayatri Vidya Parishad College of Engineering

Aug 2023 – May 2027

B.Tech in Computer Science (Data Science)

CGPA: 8.9

Ascent Junior College

Jun 2021 – May 2023

Intermediate (MPC)

94.4%

Relevant Coursework

Machine Learning — Deep Learning — NLP — Statistics — Data Structures

Technical Skills

Programming: Python, R, SQL, C, Java

AI & Data Science: Deep Learning, NLP, Large Language Models

Frameworks/Platforms: LangChain, Hugging Face, OpenAI API

Analytics & Visualization: Power BI, Excel

Tools: Pandas, NumPy, FAISS, Git, VS Code, Google Colab

Internships

Data Analytics Intern – Infosys SpringBoard (Virtual)

Feb 2026 – Mar 2026

- Analyzed real-time healthcare data using Python to extract meaningful insights.
- Built an interactive dashboard using Streamlit to visualize key metrics and trends.
- Applied data preprocessing techniques to ensure data quality and improve decision-making.

Data Science Master Intern – Altair Engineering (Virtual)

Jan 2026 – Mar 2026

- Analyzed enterprise datasets exceeding 50K+ records.
- Generated statistical insights supporting business decisions.
- Improved reporting efficiency by 30% using visualization dashboards.

Projects

Aadhaar-Based E-Voting Platform

- Developed a secure online voting system allowing users to login using their Aadhaar number.
- Implemented user authentication and verification to ensure voter identity and prevent duplicate voting.
- Generated real-time vote count and results display for transparency.

MedInsight – Healthcare Data Dashboard

- Built a healthcare dashboard with Streamlit and Python for real-time data visualization.
- Performed data preprocessing and EDA to identify key trends and patterns.
- Created interactive visualizations to monitor healthcare metrics and insights.
- Designed a user-friendly system for efficient data-driven decision-making.

Long-Context Narrative Consistency Verification

- Built AI system verifying causal consistency across large-scale text datasets (100K+ words).
- Applied claim extraction, semantic retrieval, and contradiction detection.
- Optimized runtime using embedding caching for scalability.

Certifications & Activities

Python (IBM, Infosys) — Data Analytics (Accenture) — Power BI (Microsoft Learn)

Hackathons: SIH, UIDAI, Kharagpur Data Science Hackathon

Solved 300+ DSA problems (LeetCode, GeeksforGeeks)
